## WALKER BAY

Using a completely new technology, Walker Bay's Airis inflatable kayaks feature AirWeb high-pressure construction (patent pending), formed from a heavy-duty, seven-layer, polymer-coated fabric that is joined inside by thousands of drip-stitch fibers. This fiber web allows the two-chamber Play and Sport models to be inflated up to six times the maximum air pressure of other inflatable kayaks. The result is an extremely rigid hull that handles superbly, paddles easily, and rolls up to fit in its own backpack (included). Each model is offered in two sizes. The Play is available in 8-foot and 9-foot lengths, which weigh 15 and 18 pounds, respectively. The Sport models are designed for light expeditions and feature integrated dry storage for your gear. They are available in 10-foot and 11-foot lengths and weigh 20 and 21 pounds, respectively. Both versions have a 33-inch beam, two-chamber construction, and carry a single passenger. MSRP for the Play is \$749 for the 8-foot version and \$849 for the 9-footer. Sport models retail at \$1,149 for the 10-foot version and \$1,249 for the 11-foot version. All models come with an adjustable backrest, high-pressure air pump with gauge, custom backpack, and a limited two-year warranty. The company also makes inflatable yacht tender-style boats featuring a choice of air floor or slatted floor that are suitable for RV use.
