Supertender 325 and 365 Deluxe Console RIB

The NEW Supertender 325/365 Deluxe Console RIBs combine the Supertender RIB with our NEW Deluxe Fiberglass console unit. Together they create an amazing small boat, boasting more storage than any boat this size. Superior comfort and exceptional performance from a deep-V Hull, result in the best small console RIB in rough water. The custom-designed console offers more legroom for the driver, creating an exceptionally comfortable riding position. Integrated seat cushions and backrest combined with the smooth ride of the deep-V hull give passengers the feeling of being in a boat twice the price. Unlike other

RIBs this size, the Supertender's hull has a Deep V which cuts smoothly through rough chop for a smoother ride and deflects water down into cross winds so you stay dry in rough windy conditions. This combined with the wider bow design also blocks any spray keeping it away from passengers. The Supertender has a pronounced chine which grips better in turns so there is no cavitation of the motor. The V in the hull is gradually reduced to stern creating a section in the rear of the hull for lift and improved early planing. Smooth dry ride combined with early planing. Everything you need in a small rigid inflatable boat.

FEATURES

- Extra Deep V in the hull provides a smoother ride in rough water
- Hull shape deflects water down for a dryer ride
- Wider bow means more space up front and room enough for a large bow locker which fits a large 6.6 gallon gas tank
- Built tough from Walker Bay's DuraTech™ molded construction. Vacuum resin molded with a foam core making it stronger and lighter than other comparable boats
- Available in either German Heytex PVC or ORCA CSM fabric
- Large 18" diameter tubes and towing D-Rings included
- Additional reinforcement areas in the hull and deck for different davit lifting point options
- Tube set length matched to LOA with motor for maximum performance
- Deluxe seat and large Bow Locker
