# VENTURE

The Venture series is the world's first Luxury Sport Tender line.

The Venture series is designed for cruisers who want to get the most out of their time on the water and consider their tender an extension of their yacht. The Venture makes getting around comfortable and easy and can also be used for much more. Whether you enjoy exploring, fishing, diving or snorkeling, towing sports like wakeboarding or tubing, driving and relaxing, the Venture can handle it all. Integrated features you would normally find on dedicated sport boats are included in a stylish and very comfortable design to make the most out the activities you and your guests are passionate about.

## Go further. Do more.

### First Class Comfort & Ergonomic Design.

The Venture series is the most comfortable tender to drive. The unique combination of a flip up bolster, deep heel recess, tilt steering and top mount throttle allows the driver to sit, lean, or stand while driving. A true comfortable stand up driving position for exploring, mooring and a better view of what is under and around the boat. A semi-seated position for watersports and mooring. And a fully seated position for touring and relaxing.

The rear seat of the Venture is wider than any other boat in its class. The cushions are thick and the deep seats and extra legroom allow the driver and rear seat passenger to fully stretch their legs out.

The Venture also offers unique factory options you won't find on other tenders such as a telescopic ski pole, stainless steel flush mounted rod holders and fresh water shower.
