WALKER BAY

walkerbay.com

Crafted without Compromise.

The Walker Bay G-SERIES of luxury performance tenders represents our commitment to creating the world's best luxury outboard console tenders. A thrilling combination of head-turning design, unparalleled comfort and incredible performance. Simply put, the G-SERIES line of RIBs perform as good as they look.

The all-new G17

Thick diamond quilted cushions are designed to deflect excess water and keep you comfortable and dry.

Simply Beautiful

Elegant lines. Refined styling. The G-Series are designed to look as good as they perform. Whether on the water or at the dock, thoughtful proportions, sleek lines and intelligent layouts create a distinctive and elevated sense of style. Every detail has been considered, nothing overlooked. G-Series RIBs are as refined as they are ready for adventure.

Built for Comfort

Every detail in the G-Series line is designed to provide a more comfortable, more exciting and more enjoyable boating experience. An extra wide beam allows for a comfortable and spacious interior layout with extra-thick cushions and quilted embroidery with foam that drains water so you stay drier.

Thoughtfully designed storage and cleverly hidden fuel tanks under the deck mean more room to relax and move around the boat safely and easily. We put thought into every detail of the G-Series by using premium materials and integrating details often overlooked in other boats. Simple things like cup holders, large bow and stern steps and integrated speaker locations make your enjoyment on the water the very best it can be.

The G15 features extra-wide bench seating and a spacious L-shaped layout.

EVA boarding step

Integrated speakers for better sound

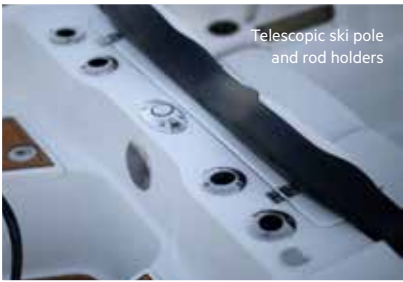

Ergonomic console with room for electronics and accessories

Built to Perform

We created the G-Series to deliver outstanding performance in every way. After all, how a boat performs can directly impact your experience on the water. Our industry-leading build process, advanced fiberglass technology and materials create a boat that's light, strong and reliable. A modified V-hull design cuts through chop to give a smooth ride, great handling and reduced spray at higher speeds and in rougher conditions.

Great performance goes beyond ride and handling. The G-Series come equipped with features and accessories that allow you to make the most of every moment on the water. Whether you are simply exploring and entertaining or enjoying activities like tow sports, fishing or snorkelling, the G-Series gives you the options to go further and do more.

Telescopic ski pole and rod holders

Built to Last

Every aspect of a Walker Bay RIB is engineered for lasting durability and exceptional performance. Advanced construction methods, including RTM and vacuum infusion, create components that are lighter, stronger, and built to perform. Composite foams and vinylester resins further enhance strength, rigidity, and efficiency, while ORCA® CSM tubes provide exceptional resistance to UV exposure, abrasion, and demanding marine conditions. From the rigid hull and advanced tube fabrics to every high-quality component, Walker Bay is designed to deliver lasting reliability, confidence and pride of ownership.
